

The ICACSF Announces the Release of the 2011 ICACSF Standards

JANUARY 2011 | Serving as the basis of the accreditation process, the ICACSF Standards are an extensive document defining the minimal requirements and recommendations for facilities to perform quality carotid stenting procedures.

The ICACSF Standards are divided into five sections: Section 1: Personnel and Supervision; Section 2: Physical Facilities; Section 3: Volume of Clinical Procedures; Section 4: Process; and Section 5: Quality Improvement. The Standards are intended for used by facilities as a guideline to achieve and demonstrate quality patient care.

The 2011 ICACSF Standards for Carotid Stenting Facilities are available for download as a PDF. Visit the website at www.icacsf.org.
