

NUCLEAR/PET

Payment Policies

To date, the IAC is aware that the following insurers or companies have adopted nuclear medicine, nuclear cardiology and/or PET reimbursement directives. While the IAC attempts to stay abreast of reimbursement policies as a service to the nuclear/PET community, these policies are changed and updated regularly by the insurance carriers. Therefore, the IAC recommends that applicant facilities contact the insurance carriers in their area for the most accurate and current information to ensure compliance with reimbursement requirements at all times. If you are aware of additional payment policies, or have questions about the information posted, please e-mail reimbursement@intersocietal.org.

PLEASE NOTE: The policy details within this document detailing accreditation requirements are referenced directly from insurer websites and manuals and are only a portion of the full reimbursement directives, please search for the full policy using the links provided.

Aetna (National)

Referenced from the [Office Manual for Health Care Professionals](#) – All Regions

Radiology Accreditation

Aetna requires accreditation to be eligible for reimbursement for the technical component of advanced diagnostic imaging procedures. Accreditation can be from:

- American College of Radiology (ACR)
- **Intersocietal Accreditation Commission (IAC)**
- Joint Commission (TJC), and/or RadSite

The following types of providers require this accreditation:

- Independent diagnostic testing facilities
- Freestanding imaging centers
- Office-based imaging facilities
- Suppliers of advanced diagnostic imaging procedures

For these purposes, advanced diagnostic imaging procedures exclude X-ray, ultrasound, fluoroscopy and mammography. Included are:

- Magnetic resonance imaging (MRI)
- Magnetic resonance angiography (MRA)
- **Computed tomography (CT)**
- Echocardiograms
- Nuclear medicine imaging, such as positron emission tomography (PET)
- Single photon emission computed tomography (SPECT)

Note: Providers not accredited by the ACR, IAC, TJC and/or RadSite will not be eligible for payment for advanced diagnostic imaging services.

Please note: The above requirements list only a portion of the full reimbursement directive as related to accreditation. For full requirements, please refer to the [Network Participation Criteria](#) or the [Office Manual for Health Care Professionals – All Regions](#) (Updated February 2025)»

Arkansas BCBS

Referenced from the ABCBS Provider Manual

Per the terms of participation for the Arkansas Blue Cross and Blue Shield Preferred Payment Plan, Health Advantage HMO network, and USABLE Corporation's Arkansas' FirstSource® and True Blue PPO networks, **advanced imaging centers must be accredited by one of the agencies that meets approval per these networks' required accreditation program.** This includes advanced imaging centers purchased by another organization, including hospitals.

In most situations, a currently accredited imaging center can simply notify the accrediting agency (e.g., American College of Radiology or [Intersocietal Accreditation Commission](#)) and ask for a certificate with the new organization's name applied to it. Arkansas Blue Cross, Health Advantage, and USABLE Corporation will need a copy of the new certificate.

Please understand that if the imaging center's new owner is a hospital, the hospital's Joint Commission accreditation does not automatically apply. In order for this to apply, the hospital must be performing both inpatient and outpatient imaging services and the imaging center must have been part of the on-site review performed by the Joint Commission when the accreditation was given.

Please note: The above requirements list only a portion of the full reimbursement directive as related to accreditation. For more information on the ABCBS requirements, please review the [ABCBS Provider Manual](#) (Updated March 2025)»

BCBS of Alabama

Preferred Radiology Program ([link](#))

The Preferred Radiology Program (PRP) was created to:

- Support referring physicians in their decision-making process
- Promote patient safety by eliminating unnecessary duplication of diagnostic services
- Maximize customer benefits by providing the most current clinical and technical recommendations to radiology providers
- Minimize patient out-of-pocket costs by directing patients to a diagnostic facility participating in the Blue Cross network

The following components are included in the program:

- [Precertification of Advanced Imaging Services](#)
- Accreditation through American College of Radiology (ACR) and/or **Intersocietal Accreditation Commission (IAC)** and/or RadSite.

Blue Cross of Idaho

Referenced from the Blue Cross of Idaho Provider Administrative Policy

Imaging Accreditation

This policy is intended to promote reasonable and consistent quality and safety requirements for providers of imaging services. We established these requirements to describe the accreditation and certification conditions a person might associate with high-quality imaging services. We hope to establish an environment where qualified operators perform imaging studies using appropriate equipment and techniques and where qualified physicians interpret images.

These requirements apply to all non-hospital providers of advanced imaging services. They supplement the requirements for facility providers and physicians as contained in the Facility, Physician and Clinic Agreements.

Specific Requirements for Physician and Facility Imaging Providers

- Physician or clinic providers that use advanced imaging equipment in their practice to diagnose and treat their own patients within their own specialty area of practice may not accept referrals from other providers for the purpose of performing diagnostic imaging tests for other providers' patients.
- Facility providers must be certified by Medicare as an Independent Diagnostic Testing Facility (IDTF) or radiology clinic. These facilities may accept referrals from community physicians. These facilities must be available for diagnostic imaging services for a minimum of 40 hours per week and have images available after hours.

Requirements Specific to Nuclear Cardiology

- **Nuclear cardiology practices must achieve accreditation by [IAC Nuclear/PET \(formerly ICANL\)](#) or the ACR (American College of Radiology) within two years of Provisional acceptance in the Privileging Program.**

Please note: The above requirements list only a portion of the full reimbursement directive as related to accreditation. Review the complete policy (Revised February 2025) on the Blue Cross of Idaho website at providers.bcidaho.com/policies-and-procedures/pap/pap249.page.

BCBS of Louisiana

BCBSLA requires accreditation in Diagnostic Services in order to participate in their networks.

Diagnostic Services (including CMS Independent Diagnostic Testing Facilities)

Accreditation – Accredited facility types: Nuclear Medicine, MRI, CT and PET by American College of Radiology (ACR) or International Accreditation Commission (IAC) or other appropriate accreditation as applicable.

BCBS of Michigan

Freestanding Radiology Center

To enroll, providers in a freestanding radiology center are required to submit an accreditation certificate from one of the following:

- American College of Radiology or,
- [Intersocietal Accreditation Commission](#) or,
- The Joint Commission

For more information, reference the Provider Enrollment and Change Process Required Document Checklist on the BCBS of Michigan website (www.bcbsm.com/amslibs/content/dam/public/providers/documents/enrollment/WP-11225-Reg-Doc-Checklist.pdf – Updated December 2024).

BCBS of North Carolina

Facilities Application (credentialing + enrollment)

Free Standing Radiology

Please include the following documents with your application:

- A copy of a NC license or Certificate of Need (if applicable per state or federal regulatory requirements)
- **One of the following accreditation certificates is required:**
 - American College of Radiology (ACR)
 - [Intersocietal Accreditation Commission \(IAC\)](#)
 - The Joint Commission (JCAHO)
- Medicare certification
- A general liability malpractice insurance face sheet. It must include current coverage dates, provider name, address, and limits of coverage (\$1 million per occurrence/\$3 million per aggregate) or letter attesting to all covered sites.

For more information on the credentialing process as related to accreditation, please visit

www.bluecrossnc.com/providers/network-participation/provider-facility-applications, scroll down Freestanding Radiology.

BlueCross BlueShield of Texas

Accreditation:

Centers for Medicare and Medicaid Services (National)

Accreditation of Advanced Diagnostic Imaging Suppliers

I. Background

Section 135(a) of the Medicare Improvements for Patients and Providers Act of 2008 (MIPPA) (P.L. 110-275) amended section 1834(e) of the Social Security Act (the Act). This amendment requires suppliers of the technical component of advanced diagnostic imaging (ADI) services to be accredited by a designated accrediting organization in order to receive Medicare reimbursement. This accreditation requirement for ADI suppliers was effective January 1, 2012. CMS has the statutory authority to designate accrediting organizations which accredit suppliers furnishing the technical component of ADI services. These requirements do not apply to hospitals or critical access hospitals.

Under section 1861(d) of the Act, an ADI supplier is defined as a physician or other practitioner, or facility such as an Independent Diagnostic Testing Facility that furnishes the technical component of ADI services. “Technical component” is defined as all non-physician work performed by an ADI supplier, including administrative and non-physician personnel time and use of the ADI equipment and facility.

Section 1834(e)(1)(B) of the Act defines “advanced diagnostic imaging” procedures as diagnostic magnetic resonance imaging (MRI), computed tomography (CT), and nuclear medicine imaging procedures, such as positron emission tomography (PET). ADI procedures do not include x-ray, ultrasound, fluoroscopy procedures or diagnostic and screening mammography.

Note: Diagnostic and screening mammography are subject to oversight by the U.S. Food and Drug Administration.

II. Information about the Advanced Diagnostic Imaging Accrediting Organizations

- Application for CMS-designation as an ADI accrediting organization is a voluntary process. Application and re-application procedures are set forth at 42 CFR 414.68(c). (A link to these regulations is available in the “Related Links” section below).
- Each designated ADI accrediting organization may establish its own individual quality standards. At a minimum, these standards must address, but are not limited to, the following areas: staff qualifications; equipment standards and safety; safety of patients, family and staff; medical records; and patient privacy.
- While the standards among the designated ADI accrediting organizations may vary, each accrediting organization must demonstrate that its accreditation program standards meet or exceed the standards established by statute and in the Medicare regulations.
- Designated ADI accrediting organizations are private entities which charge fees for their accreditation services.
- Suppliers or other entities seeking additional information about CMS-designated ADI accrediting organizations and their accreditation programs may contact the accrediting organizations listed below.

III. CMS-designated ADI Accrediting Organizations:

- American College of Radiology (ACR)
- **Intersocietal Accreditation Commission (IAC)**
- RadSite
- The Joint Commission (TJC)

For complete policy details, [please visit the CMS website](#)»

eviCore Healthcare (National)

Accreditations, Insurance, and Reporting Requirements:

1. A facility seeking to furnish the technical component of advanced diagnostic imaging services (MR, CT, PET or NM) is **required** to be accredited by one of the following: the American College of Radiology (ACR), the Intersocietal Accreditation Commission (IAC), The Joint Commission (TJC), or RadSite. Accreditation by the American Institute for Ultrasound in Medicine (AIUM) or the American Society of Breast Surgeons (ASBS) is also acceptable for facilities in networks requiring ultrasound accreditation. ACR accreditation or state certification, is required for all mammography units. Accreditation is required at a modular level for each type of service rendered at the facility (examples: a Head or Neurologic module is required for studies of the brain; the cardiac module is required for all cardiac procedures). The requirements of the accrediting organization must be met at all times to maintain reimbursement.
2. Accreditation applications for new installations (new facility, additional modality or replacement equipment) must be submitted to an approved accrediting organization within three (3) months of first clinical use.

Equipment Requirements:

High-Tech Requirements (applicable to all networks):

Nuclear Medicine (including Nuclear Cardiology or PET) Standards

- Current ACR, IAC, TJC, or RadSite modular accreditation for each NM or PET at the facility.
- New applications to perform PET/CT units with less than a 4 slice CT are acceptable if the CT is NEVER utilized as a diagnostic CT unit.
- For current participating facilities utilizing a PET only unit, fusion software purchased or upgraded in the last five (5) years must be used on every case.
- If the last major software upgrade is more than five (5) years old, written confirmation is required from the service engineer confirming that the unit has the most up-to-date software upgrade available.
- PET or PET/CT units utilizing Sodium Iodide Detector systems are unacceptable regardless of configuration and will not be approved for the eviCore networks.
- Phantom testing to be performed semi-annually, but recommended to be performed quarterly.

Minnesota House Bill 2276

Effective August 1, 2013, Minnesota facilities and hospitals that furnish advanced diagnostic imaging (ADI) services (inclusive of Nuclear/PET, MRI and CT) must be accredited by an organization approved by the United States Department of Health and Human Services in order to receive reimbursement. The [Intersocietal Accreditation Commission \(IAC\)](#) has been designated as an **approved accrediting organization**. Here are the major points of the bill related to accreditation, facilities should be aware of:

SECTION 1 (SUBDIVISION 2)

Accreditation required. (a)(1) *Except as otherwise provided in paragraph (b), advanced diagnostic imaging services eligible for reimbursement from any source, including, but not limited to, the individual receiving such services and any individual or group insurance contract, plan, or policy delivered in this state, including, but not limited to, private health insurance plans, workers' compensation insurance, motor vehicle insurance, the State Employee Group Insurance Program (SEGIP), and other state health care programs, shall be reimbursed only if the facility at which the service has been conducted and processed is accredited by one of the following entities:*

- (i) American College of Radiology (ACR);
- (ii) [Intersocietal Accreditation Commission \(IAC\)](#);
- (iii) the Joint Commission; or
- (iv) other relevant accreditation organization designated by the secretary of the United States Department of Health and Human Services pursuant to United States Code, title 42, section 1395M.

(2) All accreditation standards recognized under this section must include, but are not limited to:

- (i) provisions establishing qualifications of the physician;
- (ii) standards for quality control and routine performance monitoring by a medical physicist;
- (iii) qualifications of the technologist, including minimum standards of supervised clinical experience;
- (iv) guidelines for personnel and patient safety; and
- (v) standards for initial and ongoing quality control using clinical image review and quantitative testing.

(b) Any facility that performs advanced diagnostic imaging services and is eligible to receive reimbursement for such services from any source in paragraph (a)(1) must obtain accreditation by August 1, 2013. Thereafter, all facilities that provide advanced diagnostic imaging services in the state must obtain accreditation prior to commencing operations and must, at all times, maintain accreditation with an accrediting organization as provided in paragraph (a).

Subd. 3. Reporting. (a) Advanced diagnostic imaging facilities and providers of advanced diagnostic imaging services must annually report to the commissioner demonstration of accreditation as required under this section.

(b) The commissioner may promulgate any rules necessary to administer the reporting required under paragraph (a). [View the full requirements for bill](#)»

If your facility is not granted accreditation through one of the approved organizations by August 1, 2013, it will not receive reimbursement. Your facility must, at all times, maintain accreditation with an accrediting organization.

UnitedHealthcare (National)

Imaging Accreditation

UnitedHealthcare is committed to ensuring that all of our members have access to quality health care, including medical imaging services.

We believe patients deserve assurance that equipment, technologists and physician practices are in compliance with professional society-developed performance standards for CT, MRI, PET, nuclear medicine/cardiology and echocardiography procedures (collectively referred to as "Advanced Imaging Studies").

If you perform Advanced Imaging Studies and bill on a Form CMS 1500, or the electronic equivalent, you must obtain accreditation from one of the accrediting agencies listed below.

- American College of Radiology (ACR)
- [Intersocietal Accreditation Commission \(IAC\)](#)
- RadSite
- The Joint Commission (TJC)

Accreditation is required for the following Advanced Imaging Studies:

- CT scan
- Echocardiography
- MRI
- **Nuclear Medicine / Cardiology**
- **PET scan**

Pursuant to our Imaging Accreditation Program, we require accreditation for Advanced Imaging Studies. At this time, however, we will not require accreditation as a condition of eligibility for reimbursement and, therefore, will not administratively deny claims for Advanced Imaging Studies based on lack of accreditation. When a decision is made to activate the claim denial component of the Imaging Accreditation Program, we'll communicate the effective date to you. We remain committed to advancing the quality and safety of imaging services through the Imaging Accreditation Program and will keep you apprised of any changes to our program.

Learn more at www.uhcprovider.com/en/resource-library/Join-Our-Network/Dental-Vision-Behavioral-Health.html >> Imaging Accreditation.

UnitedHealthcare (California Ancillary Service Care Providers)

Accreditation from **American College of Radiology or Intersocietal Accreditation Commission**, in order to participate in the **network** is required for Radiology and Independent Diagnostic Testing Facility (IDTF) - CT, MRI, MRA, PET or Nuclear Medicine.

Learn more at www.uhcprovider.com/en/resource-library/Join-Our-Network/Ancillary-Facilities.html.

UnitedHealthCare - Oxford Health Plans (CT, NJ, NY)

Accreditation Requirements for Radiology Services

In diagnostic imaging, accreditation programs have emerged as key initiatives to advance the quality and safety of imaging studies. It is important that Members receive services from facilities whose equipment, technologists, and physicians are in compliance with established accreditation performance standards. **All freestanding facilities and physician offices performing outpatient radiology advanced imaging studies in the eviCore imaging network are required to obtain and maintain accreditation as a condition for reimbursement for the below services.** Radiologists seeking reimbursement for advanced imaging must have the laboratory/facility accreditation on file.

Provider Specialty	Accreditation in Appropriate Module	Modality/Procedure
Radiology Facilities	ACR	MRI, Breast MRI, CT, Nuclear Medicine, PET, Ultrasound, Breast Ultrasound, Mammography, Stereotactic Biopsy
	AIUM	Ultrasound, Breast Ultrasound
	IAC	MRI, CT, Nuclear Medicine, PET, Ultrasound
	RadSite (except cardiac procedures)	MRI, CT, Nuclear Medicine (SPECT), PET
	TJC	MRI, CT, Nuclear Medicine, PET, Ultrasound, X-ray, Breast Ultrasound, Stereotactic Breast Biopsy

Learn more at www.uhcprovider.com/content/dam/provider/docs/public/policies/oxford/accred-requirements-radiologists-radiology-centers-ohp.pdf (Effective 8-1-2023).

Wellmark BCBS (Iowa, South Dakota)

Referenced from the Wellmark Provider Guide

Facility/Entity Accreditation/CMS Requirements

All facilities/entities must have at least one of the following licenses/certifications/accreditations to meet credentialing requirements:

Radiology/Imaging Center (including, but not limited to, the following types of centers):

- General Radiology
- CT, CTA
- Echocardiography
- Mammography
- MRI, MRA
- **Nuclear Cardiology**
- **PET Scan**
- Radiation Oncology
- Ultrasound
- Portable X-Ray

Centers offering any of the services listed immediately below must be accredited by ACR or one of the accrediting agencies of the [Intersocietal Accreditation Commission](#) (IAC Vascular Testing, IAC Echocardiography, IAC Nuclear/PET, IAC MRI or IAC CT):

- CT
- CTA
- **Nuclear Cardiology**
- Echocardiography
- **PET**
- **PET/CT**
- MRI
- MRA

If the center does not offer any of the services above, it must be accredited by AAAHC, The Joint Commission, ACR, or one of the accreditation agencies of the Intersocietal Accreditation Commission (IAC Vascular Testing, IAC Echocardiography, IAC Nuclear/PET, IAC MRI or IAC CT).

Note from IAC: The above requirements list only a portion of the full reimbursement directive. Please refer to the [Wellmark Provider Guide](#) (updated March 2025) for additional information on the complete requirements and for specific requirements for other modalities.
